BRINGING GENERATIVE AI ENTERPRISES WITH ACCETURE
VIDEO TRANSCRIPT

[Music]
0:02
we as the Enterprise it organization are
0:04
taking data that we have and
0:06
consolidating it into new models so that
0:08
our people can get the information
0:10
faster and help assist them to do their
0:12
client work that much more
0:15
effectively generative AI is clearly
0:18
going to be a massive Market shift that
0:20
everyone is going to react to I think
0:22
there's going to be tremendous shift to
0:24
do more faster with what Google is
0:27
offering those tools are going to enable
0:30
the permutations and combinations for us
0:32
to look at all of our insights
0:34
differently how we run our business how
0:35
we think about our data Accentra and

0:38
Google Cloud today are excellent
0:39
partners and it's only going to grow we
0:42
already partner across the cloud space
0:44
we've announced recently our partnership
0:45
in the security space and I think this
0:48
is just a momentum we have all started
0:50
on that's going to expand very rapidly
0:52
for us and all of our clients I am blown
0:55
away with how far we've gotten so fast
0:58
but I think we are at the tip of the
1:00
iceberg this is going to be an
1:02
industrial revolution translation of
1:04
what's going to happen in the world in
1:06
the next couple of
1:14
years
