

Operations 360° Virtual Tours

BENGALURU

Sourcing and Procurement
Video Transcript

Welcome to the virtual tour of Intelligent Operations Center in Bengaluru.

This short video can be paused at any point if you want to look around for longer. If you are watching this on your laptop, you can navigate the 360-degree experience using your cursor or touchscreen. You may also use a virtual reality headset for a fully immersive experience.

Ready?
Let's go!

Welcome to Bengaluru!

Bengaluru, known as India's Silicon Valley, is one of the fastest growing cities in India.

It is also home to our largest Intelligent Operations Center in the world. This is an example of one of our 50+ centers around the globe dedicated to accelerating your sourcing and procurement transformation, helping you drive innovation and build a sourcing and procurement function that's ready for the future

This facility, like all our other locations, is fully ISO® 14001 Environmental Management System-Certified. From smart meters to renewable energy, we continue to assess and minimize how we impact our environment.

Our diverse teams of industry, functional and domain experts, AI engineers and data scientists work together in a collaborative and innovative space across 11 floors at this facility.

This includes experts focused on sourcing and procurement functions including Source to Pay; Source to Contract and Procure to Pay.

It is here where we would work with you to deliver sourcing and procurement business process services, using design thinking and our proprietary frameworks and technology-- ultimately evolving your sourcing and procurement function to be leading class, future ready, agile, and more efficient.

At the heart of our approach for accelerating the journey to digital, data-driven, intelligent operations is our SynOps platform. Here, in our SynOps hub on the 9th floor, you can take a good look at how we make intelligent operations a reality.

SynOps orchestrates the optimal combination of human + machine talent, driven by data and insights, to create an evolved, intelligent operating model, to deliver target business outcomes.

The SynOps dashboard help us continuously monitor the performance of people and technologies. Ultimately, giving us the control to get ahead of issues before they become critical

Exceptional talent.
Innovative technology.
Powerful insights.

SynOps is powering Intelligent Operations.
