

SCIENTIFIC INFORMATICS SERVICES

VIDEO SCRIPT

This is your laboratory.

And this is your lab, powered by Scientific Informatics from Accenture.

We guide life sciences companies around the world through digital transformation—digitizing scientific and laboratory data, and equipping them with the right processes, technology, and people, to bring life-changing treatments to patients.

Over 25 years, we've grown to a global team supporting tens of thousands of scientists in over 30 countries, delivering hundreds of successful projects every year.

Our domain experts hold advanced degrees in scientific and technical fields, with expertise in all major industries, including biotech; pharma; oil, gas and chemicals; and consumer goods and health.

Starting with your informatics Strategy, we can help you plan lab systems, implement new data management solutions, and operate the technology that will extract valuable insights from your data, and lead to breakthrough treatments.

And with vendor partnerships around all major laboratory informatics solutions, data analytics, machine learning and more, you have access to an unmatched ecosystem of technology innovation.

This is your lab. And with our global scale and laboratory transformation expertise, you have the partner to realize the promise of what your lab can be.
