**Accenture completed a green cloud assessment with Canada Mortgage and Housing Corporation (CMHC) to better understand the sustainable impact CMHC would have through its digital transformation. [Read more about CMHC's sustainable digital transformation journey and impact in its 2020 annual report.](#)**

Through leveraging cloud computing capabilities that slashed power consumption requirements, CMHC reduced IT-related CO<sub>2</sub> emissions by over 80%. In addition,

the transformation enabled a Results-Only Work Environment (ROWE), empowering employees with cloud-based collaboration tools accessible from anywhere. These cloud-based collaboration tools have served CMHC extremely well when the organization had to pivot to a fully remote workforce due to the pandemic.

We estimate that this has eliminated 52% of travel-related emission, which is equivalent to removing emissions from more than 300 Canadian homes.
