CLIENT BUSINESS PROJECTION | FUTURE SYSTEMS

VIDEO TRANSCRIPT

0:00
at accenture we don't think of IT as a

0:03
collection of individual tools we see it

0:05
as future systems that are bound realest

0:08
without the traditional barriers within

0:09
the IT stack between companies and

0:12
between humans and machines so we're

0:14
developing a suite of intelligent

0:16
information platforms that can

0:17
continually evolve enhance and expand

0:20
across Accenture we've shifted our

0:22
client forecasting process from a manual

0:24
process to a secure automated and

0:27
real-time projection capability our

0:30
resulting client business projection

0:32
solution transforms the business process

0:35
with an experience driven serverless

0:37
and cloud hosted application by

0:40
leveraging it censures enterprise

0:42
platform infrastructure and the large

0:44
volume of financial data that we have

0:46
ittan forms and supports business

0:48
decisions growth and development at both

0:51
an account and a corporate level today

0:53
the more accurate client forecast

0:55
process is transforming the way we do

0:58
business no matter where they are in the

1:00
world team members and leadership can

1:03
edit their projections interact online

1:05
and conduct continuous dialogue to

1:07
identify what they need to do what used

1:09
to take hours takes minutes by going

1:13
boundary lists we're applying the new

1:15
now
