

ANAPLAN AT ACCENTURE

VIDEO TRANSCRIPT

Anaplan is a simple to use single cloud-based platform that is designed to bring people and company functions together to make better informed decisions and greater speed. Accenture's Anaplan practice empowers businesses to rapidly design build leading operational and performance management applications that place them way ahead of their competition. Accenture supports finance performance and analytics transformation enabling enterprise insights across all industries and geographies from industrial equipment to fast moving consumer goods to telecommunications. We do so with our global expertise, strong partnerships, and deep assets. By leveraging our global delivery network, Accenture's Anaplan practice enables enhanced planning and reporting performance through three key components: specific capabilities and industry expertise, industry specific Anaplan assets, and the Accenture delivery methodology. We deploy unique capabilities to deliver value at pace on all Anaplan engagements. Our prebuilt accelerators help our clients innovate by leveraging technology as a key enabler. Accenture's delivery methodology follows an iterative, agile implementation approach that brings robustness, pace, and certainty. We focus on the big picture with fast, targeted building initiatives to guarantee value across all life cycles of the initiative. To figure out the future for your clients, and drive the right decisions of tomorrow, get started with Anaplan today.
