

# ACCENTURE SMART PLUG – A CONNECTIVITY IDEA APPLIED

## Why do you need data from your assets?

To monitor and control in real time. To improve your shop floor efficiency through advanced analysis. To boost your processes and product quality. To enhance workers awareness. To predict your shop floor performances.

## SMART PLUGS

Smart plug installation in Modena Innovation Center

**Catch an incredible value.** Transform your organization from workflow driven to data driven. Optimize your resources through Artificial Intelligence and predictive algorithms. Empower your workforce with smart technologies and data. Generate new insights by integrating equipment, Manufacturing Execution System, ERP and digital workers.

**Leverage our know how.** Retrofit integration to collect complex data within an heterogeneous shop floor. PLC integration to collect specialized data from an equipment subsystem. Hybrid Integration to merge benefits of retrofitting and PLC integration. Data scientists to deeply understand and interpret equipment behavior. Wide ecosystem to cover any industrial scenario.

## PLUGGED

**SMART PLUG a connectivity idea applied**
