

Chief Technology Officer-as-a-Service

[MUSIC STARTS]

[Dr Tan] Hello everyone, I am Dr Tan Teik Kheong,

[Andreu Han] and I am Andreu Han.

[Dr Tan] We've been working with SMEs on their digital adoption and transformation journey.

[Andreu Han] We warmly welcome you to participate in Chief Technology Officer-as-a-Service.

This is an IMDA initiative under the SMEs Go Digital Programme to help SMEs identify and access resources they need to digitally transform.

[Dr Tan] Accenture Singapore has been appointed as one of the operators of this initiative and our Digital Consultants are available to help you identify your digitalisation needs; recommend suitable digital solutions and project manage your chosen solution.

In short, my fellow Digital Consultants and I are here to simplify the digital adoption journey for you.

[Andreu Han] We have been working with clients in Singapore and around the globe to unlock new opportunities by going digital.

Like how we have helped them, we can help you take the guess work out of identifying a solution and accelerate the solution implementation process through CTO-as-a-Service.

We want you to focus on what matters – growing and optimising your business.

[Dr Tan] How then do you get started?

All you need to do is request for a consultant to contact you via IMDA's CTO-as-

a-Service Web App, and my colleagues and I will reach out to schedule an online or face-to-face session.

Through the support of IMDA, our services are also provided to you at no cost for the first time.

[Andreu Han] We are excited to meet you and to work with you on your digital needs.

To start your journey with us, do connect with us through the CTO-as-a-Service Web App, or via email.

[Dr Tan] We look forward to working with you.

[ACCENTURE LOGO]
